DETAILED ACTION

This action is responsive to the Amendment after Non-Final filed June 30, 2009 and the interview on November 10, 2009. Claims 1-74 were pending. *Claims 1-26 and 28-74 are allowed.*

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert Kowert on November 10, 2009.

The application has been amended as follows:

In the Claims:

26. (Currently amended) A system for designing and implementing Web Services comprising heterogeneous components, the system comprising:

means for applying a Web Services structured methodology and one or more design patterns to a Web Service architecture to identify heterogeneous components for the Web Service architecture and to organize the heterogeneous components according to the Web Service architecture, wherein said means for applying a Web Services structured methodology and one or more design patterns to a Web Service architecture comprises:

Art Unit: 2441

means for identifying one or more logical components for the Web Service architecture according to one or more use case requirements for the Web Service;

means for translating the one or more use case requirements for the Web Service and one or more technical constraints for the Web Service to determine a plurality of heterogeneous Web Service components for the Web Service architecture, wherein the Web Service components include software components;

means for categorizing the Web Service components into two or more related groups according to a vendor-independent Web Service architecture framework;

means for organizing the groups of Web Service components in the Web Service architecture according to two or more tiers and two or more platform layers of the Web Service architecture;

means for modifying one or more of the software components according to one or more architecture principles for each of the two or more tiers and the two or more platform layers;

means for applying one or more Web Services design patterns to the Web Service architecture; and

means for providing output indicating the Web Service architecture for implementing the Web Service; and

means for implementing a Web Service comprising the identified heterogeneous components organized according to the Web Service architecture.

27. (Canceled)

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach neither singly nor in combination, the claimed limitations of "identify one or more logical components for the Web Service architecture according to one or more use case requirements for the specific Web Service; organize the groups of Web service components in the Web Service architecture according to two or more tiers and two or more platform layers of the Web Service architecture; and provide output indicating the generated Web Service architecture for implementing the specific Web Service" as stated in claim 1, and similarly stated in claims 26, 31, and 53. These limitations, in conjunction with other limitations in the independent claim, are not specifically disclosed or remotely suggested in the prior art of record. A review of claims 1-26 and 28-74 indicated claims 1-26 and 28-74 are allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
